TWA Position Statement on Release of Deer Into the Wild

*Adopted August 2, 2006*

It is the position of the TWA Executive Committee, as recommended by the TWA Deer Management Committee, that in order to avoid a "put and take" situation, or appearance of it, that any deer released into the wild per current Parks & Wildlife Statutes and/or Regulations should not be harvested any sooner than the hunting season beginning in the year following the year of the release. For example, a deer released during calendar year 2006 should not be harvested any sooner than the 2007-2008 hunting season.
